- OLED EVO
- Gallery Design
- Self-lighting OLED: Perfect Black, Intense Colour, Infinite Contrast
- α9 Gen 4 AI Processor 4K with AI Picture Pro & AI Sound Pro
- Dolby Vision™ IQ and Dolby Atmos®
- webOS® 6.0 & ThinQ® AI w/ Magic Remote

DESCRIPTION

LG OLED TV G1 is a work of art

This is art-inspired TV. Perfect lines. Bezel-less design. Impossibly thin. No gap from screen to wall. LG's Gallery Design puts the spotlight on your content, yet complements your home's interior. And only OLED pixels emit their own light for perfect black, intense colour and stunning picture — backed by AI Picture Pro and AI Sound Pro, our best 4K processor, connected home features and cutting-edge gaming tech.

KEY FEATURES

OLED EVO

LG OLED evo sets a new standard. The next-gen OLED panel has been redesigned to include an extra layer and a stronger emissive material. These optimize the structure of the panel, refining the wavelengths of light and increasing efficiency. The result is a brighter and sharper image with improved content clarity — it's not just the display that's evolved, it's your viewing experience.

Gallery Design

The incredibly slim profile of OLED allows the Gallery Design TV to hang flush* to your wall like a work of art, enhancing your home interior and adding elegance to your space.

*The cable may be visible depending on installation environment. Depending on installation environment, there may be a slight gap between the TV and the wall.
**A TV stand is NOT included with the LG OLED G1. As this model is designed to be wall-mounted, it includes a slim wall mount bracket. The TV stand can be purchased separately.

Self-lighting OLED

When it comes to picture quality, OLED beats LED hands down. That's because OLED has millions of self-lit pixels capable of producing perfect black and accurate colour. The result is a viewing experience like no other.

α9 Gen 4 AI Processor 4K

At the core of every LG 4K OLED TV is the α9 Gen4 AI Processor 4K, a groundbreaking chip that uses deep-learning algorithms to analyze and optimize content. Every adjustment to picture and sound is automatic, so everything you watch is spectacular.

Dolby Vision™ IQ and Dolby Atmos®

Dolby Vision™ IQ intelligently adjusts picture settings based on content genre and ambient surroundings, while Dolby Atmos® delivers multi-dimensional surround sound — a powerful combination that produces breathtakingly cinematic results*.

*Dolby Vision is a trademark of Dolby Laboratories. Dolby, Dolby Atmos and the double-D symbol are registered trademarks of Dolby Laboratories.
